

PARRUCCHE COIFFEUR

Wig maintenance and care:

Proper care of your Trotta wig will help keep it looking new over time. Follow the instructions for washing (recommended) once a month, in the case of daily use.

1. Fill a basin with cold water and add a small amount of neutral shampoo.
2. Submerge the wig and let it soak for about 5 minutes, shaking it gently.
3. Always rinse with cold water and pat dry with a towel to remove excess water.
4. Place the wig on its backing and allow it to dry naturally.
5. DO NOT use a blow dryer, nor flat iron, or curling iron.
6. DO NOT use bleaches, colors, cachet, or lacquers.
7. NEVER expose the wig to heat sources.

Brush the wig only when it is completely dry

How to wear the wig:

1. Make sure the hair is neatly pulled down behind the nape of the neck.
2. Grasp the side ends (sideburns) of your wig with the tips of your fingers.
3. Slip the wig on starting at the front.
4. Position the wig so that its front line matches the line of the elastic cap.
5. Using the Velcro closures on the inside of the cap, you can adjust the circumference.
6. To restore volume and comb out the wig, use a fork comb or the fingertips, modifying the combing to your liking.
7. After each use, shake the wig and place it back on the wig stand.
